

Weekly report for the Epiwork project
Week: 2-7 August, 2009.

Luis Filipe Lopes

Activities in which I have been involved in the past week:

- 1- Worked on the catalogue deliverable. Focused on doing a first draft of the document.
- 2- Still searching epidemiological articles that can be used to compare to the data scheme of the UML.
- 3- Tried to understand better the Dublin Core standard. Try to understand how the metadata extensions needed to the catalogue can be integrated with the newest version of DC.
- 4- Upload of some new datasets to the repository, related with the INForum article.
- 5- Attended some talks in the Perl conference that occurred here at FCUL.

Tasks for the next week:

- Continue reading/comparing the epidemiological articles to the UML.
- Start refining the deliverable text.

Patrícia Sousa

Activities in which I have been involved in the past week:

- Helped people installing the software that they need to work
 - Backup databases from the Meireles server.
 - Started learning how to use the NetBeans tool since it is easier to work with JSP in this environment.
 - Studied all classes that are fundamental for LDAP connection integrated on JavaBeans
- Problems in the past week:
- I could not grow on JSP language without first understand the early's of JSP language that's why I bought the book. In this moment I can understand what I have to do and learn more about the best technique's I can apply on my scripts.
 - Understand why I can't run the classes that JavaBeans need's to work with LDAP.

Tasks for the next week:

- Understand how to compile de JSP files on server Ochato without needing to reinstall all software needed to run Fedora Commons and Muradora.
- Format de Meireles server.
- Install CentOS in the Meireles server.
- Install the software needed to run the XLDB web page.
- Proceed faster to complete with my tasks.

João Zamite

Activities in which I have been involved in the past week:

- 1- Referenced the diseases on the Collector database through a CUI
- 2- Working on a few more queries on UMLS for disease name retrieval, particularly from the tables that have non-english vocabularies.

Tasks for the next week:

Absent
